Dilpreet Singh

Software Engineer

Employment History

Sky | Osterley, London, UK

Software Engineer

March 2026 – Present

- Led cross-team feature delivery from design through production alongside Product Managers and Solution Architects.
- Implemented distributed observability across Spring Boot services using OpenTelemetry.
- Exported telemetry through Sky's Kafka-based observability platform and created Grafana dashboards backed by ClickHouse.
- Worked with and maintained services deployed across AWS EC2 and EKS as the platform transitioned towards Kubernetes-based deployments.
- Mentored junior engineers and shared technical knowledge to uphold engineering best practices and coding standards.
- Integrated agentic AI solutions into existing engineering workflows, including spec-driven development with GitHub Copilot.

Associate Software Engineer

Jan 2025 – March 2026

- Joined the EMS Hydra team, developing reactive Spring Boot RESTful APIs for Sky and Comcast platforms.
- Built scalable backend services supporting millions of customers across international markets.
- Delivered features within a distributed micro-services architecture, collaborating across engineering teams.
- Followed Test-Driven Development using JUnit, Cucumber and WireMock to ensure reliable product delivery.
- Supported production releases, monitoring and post-release verification.

Graduate Software Engineer

Jul 2024 – Jan 2025

- Worked within Sky's agile GenAI team, developing experimental software solutions involving digital twins.
- Applied causal modelling techniques to build digital twins capable of simulating entities and predicting future activity.
- Used OpenAI assistant and completions APIs to improve the accuracy and performance of LLM-powered digital twins.
- Strengthened Python engineering skills, including object-oriented programming, polymorphism and automated testing.
- Developed accessible interfaces using Streamlit and Gradio, extending them with custom CSS, JavaScript and React components.
- Delivered iterative solutions in a Scrum environment while using a Kanban board to coordinate work across multiple projects.

Software Intern

Jul 2023 - Aug 2023

- Worked within the NOW iOS SDK Core Video team, contributing to the technology behind video experiences across Apple platforms.
- Developed in Swift and gained practical experience working within an established iOS codebase and SDK architecture.
- Contributed to the development of a tvOS reference application for Apple TV, applying the NOW SDK within a real client application.

Education

University of Warwick | BSc Computer Science | Coventry, UK

Sep 2021 - Jul 2024

- Graduated with a Upper Second Class (2:1) Degree.

Greenford High School | A-Levels | Greenford, UK

Sep 2019 - Jul 2021

- Obtained A-Levels in Mathematics (A*), Computer Science (A) and Physics (A).

Courses

Fundamentals of Data Science (Technical) | Southampton University

Jun 2022 - Jul 2022

- Completed a certified data science course provided by Southampton University.
- Utilised Python, MongoDB and Bokeh to collect, manage and store data.
- Acquired foundational knowledge of statistics and data science concepts such as linear regression.
